RE: Regulations of Sketch Tender
(procurement identification No. RDĪD
2011/28)

We would like to inform about the received question concerning the sketch tender regulations.

Question

How would you explain the professional conformity and compliance with respect to qualifications of a tender participant? If the participant is a legal entity and complies with the provisions of Part II and Paragraph 3.3 of the regulations, but meanwhile does not conform to Paragraph 9.1, which refers to the negotiations procedure after the tender, then can this participant take part in the procurement? P.S. The salaries at the company correspond to 70 % of the average in the respective field of specialty counting from January 2011.

Answer

Paragraph 1.5 and Part II of the Sketch Tender Regulations (hereinafter – Regulations) puts forth qualification requirements for a participant in the sketch tender. However, Paragraph 3.3 of the Regulations establishes the documents to be submitted by the participant to prove its conformity to the qualification requirements.

Part IX of the Regulations includes the requirements regarding the negotiations procedure, to which, according to Paragraph 7.1 of the Regulations, the winner of the sketch tender – the holder of the first position – will be invited. In order for the participant, who is invited to the negotiations procedure, to be recognised as the winner of the negotiations procedure and in order to gain the rights to conclude a service agreement on development of a technical project, the respective participant must meet the requirements set forth in Part IX of the Regulations, including the requirement establishing that the exclusion conditions stipulated in the first part of Section 39 of the Public Procurement Law may not be applicable to the participant.
